Dear Candidate,

Thank you for your interest in the AI Research Innovation Internship opportunity at [Proteccio Data](#).

As part of our evaluation process, we would like you to complete the following mini project assignment and submit it by EOD tomorrow.

Assignment Title

Sensitive Data Detection & Compliance Assistant

Objective

Build an AI powered application that can:

- Upload a document (PDF/TXT/CSV)
- Detect sensitive/confidential information
- Classify the detected data based on risk level
- Generate a compliance/security summary
- Allow users to ask questions about the uploaded document

Functional Requirements

Your application should support the following:

1. Document Upload

Supported formats:

- PDF
- TXT
- CSV

2. Sensitive Data Detection

Detect and identify sensitive information such as:

- Aadhaar Numbers
- PAN Numbers
- Email Addresses
- Phone Numbers
- Credit Card Numbers
- Bank Details
- API Keys / Passwords
- Employee IDs
- Confidential Business Information

3. Risk Classification

Classify the document into:

- Low Risk
- Medium Risk
- High Risk

4. AI Generated Summary

Generate:

- Compliance observations
- Security risks
- Suggested remediation steps

5. Question Answering

Users should be able to ask questions such as:

- "What sensitive data exists in the document?"
- "How many email addresses are present?"
- "Summarize this document."
- "What compliance risks are identified?"

6. Interface

You may build:

- Streamlit App
OR
- Flask/FastAPI Application
OR
- CLI-based Application

Suggested Technologies

You may use any relevant technologies/frameworks including:

- Python
- OpenAI / Gemini / HuggingFace APIs
- LangChain / LlamaIndex
- spaCy / NLP libraries
- Pandas
- Regex
- FAISS / ChromaDB (Optional)

Bonus Features (Optional)

Additional points for:

- OCR support
- Data masking/redaction
- RAG implementation
- Multi-document support
- Dashboard/UI improvements
- Dockerization
- Deployment
- Audit logging

Submission Requirements (MANDATORY)

Please submit the following:

1. GitHub Repository Link (**MANDATORY**)
2. Demo Video (2–5 minutes) (**MANDATORY**)

3. README.md with:

- Setup instructions (**MANDATORY**)
- Architecture overview (**MANDATORY**)
- AI/ML approach used (**MANDATORY**)
- Challenges faced (**MANDATORY**)
- Future improvements (**MANDATORY**)
- Working prototype deployment Link (**MANDATORY**)

Evaluation Criteria

Candidates will be evaluated based on:

- Functionality
- AI/ML Understanding
- Problem-Solving Ability
- Code Quality
- Documentation
- Security & Compliance Thinking
- Innovation

Important Notes

- You may use open-source libraries and APIs.
- Internet research is allowed.
- Directly copying complete projects from GitHub is strictly prohibited.
- Candidates should be able to explain their implementation during the interview process.

Submission Deadline

Please submit your assignment by: **July 02, 2026**.

We are not expecting a production grade application. We are more interested in your approach, problem solving skills, implementation quality, and understanding of AI/ML concepts along with better UI/UX ideas.

We look forward to your submission.

Best Regards,
Careers Team – [Proteccio Data](#)
